S-PRESSO

Kick Start your Life

You can never miss its presence on the road. With a bold design and robust stance that radiate vibrant energy, the S-PRESSO brings alive every place in the city it ventures to. It's a car built for you to take on the world and make your mark. Every drive is a self-expression of the zesty spirit that defines you. Hop into the S-PRESSO, and kick start excitement in life.

Designed to be Bold

The S-PRESSO's exterior design is a sight to behold. Its bold and athletic profile, combines with its tall and powerful stance ensuring it commands all the attention wherever it goes. The car's strong character lines and prominent exterior features such as the muscular front grille, striking front and rear bumpers, distinct headlamp and rear lamp design add to its robust appearance. Make a bold statement as you zip around corners and on lanes.

Energy Within

The moment you step inside the S-PRESSO, your eyes instantly fall on the unique centre console housing a trendy digital speedometer. Artistically crafted with bold and vibrant design elements, it's from where all the energy originates, spreading into the interior of the car. The central position of the meter cluster also gives you a new, heightened driving experience. Get in and experience the invigorating ambience of the S-PRESSO.

Meter cluster

The cutting-edge design gives it a futuristic look, while ensuring good visibility of the speedometer, allowing you to stay focused on the road ahead. The sharp and sophisticated LED display also gives you all-important details such as fuel economy, average speed, driving time and more.

New generation Display Audio

The S-PRESSO brings your drive alive with the display audio featuring a 7-inch display. It works with Apple CarPlay™ for your iPhone, as well as Android Auto™ compatible smartphone. The system lets you use apps to display navigation directions, enable voice recognition, make phone calls, access your favourite music on your smartphone and check vehicle information such as fuel consumption and vehicle alerts.

Manual air conditioner and 12V socket

While enjoying the high-energy drives of the S-PRESSO, experience the convenience it offers too. Its easy-to-operate manual air conditioner keeps you comfortable, while a 12V socket in the front console lets you charge your devices.

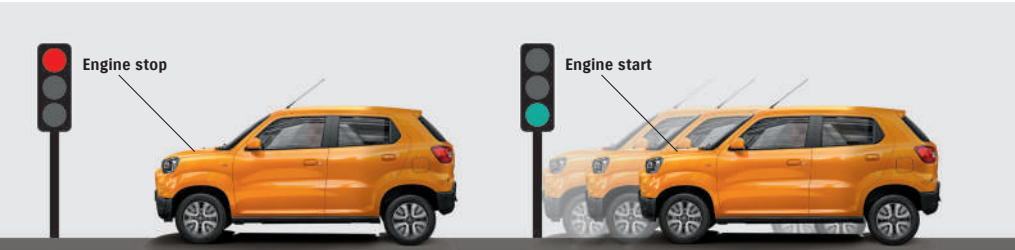

Performance and Comfort, Optimised.

The exceptional experience of the S-PRESSO is a combination of its driving performance and convenience. With a peppy engine and other innovative features you're in for an exciting drive. And because comfort matters, it has a spacious cabin and ample shoulder room. That's not all, a 239 litre luggage compartment provides enough space for multiple items, and if you require more space just fold the rear bench seats. Sit back, and gear up for an energetic drive that's equally relaxing.

1.0L DUALJET Engine

The 1.0L DUALJET engine lets you get the best out of every drive. It delivers comprehensive advantages in thermal efficiency resulting from a better compression ratio, dual injection system and friction reduction, realising a high-level of balanced dynamic performance and fuel efficiency.

Engine Auto Stop Start system (EASS)

EASS system automatically stops the engine when you stop the car, for example while you wait for the traffic lights to change. This prevents unnecessary fuel consumption and helps limit exhaust emissions and engine noise.

*Operation of Engine Auto Start system requires certain conditions to be met.

Auto Gear Shift (AGS)

The AGS is an automated manual transmission featuring an Intelligent Shift Control Actuator that automatically operates the shift and clutch. This results in ease of driving and a direct drive feel for you, along with low fuel consumption.

Manual transmission

With a 5-speed manual transmission, the S-PRESSO makes driving on any road a pleasant experience. Its transmission offers an optimal gear ratio, and reduces friction for the engine and drivetrain, enabling it to obtain the best possible fuel consumption and power performance.

Cabin compartments

The presence of storage compartments let you stow small items and drinks, adding to the comfort of the spacious interiors.

Front console cup holder

HEARTECT

HEARTECT platform

Innovation lies at the heart of the S-PRESSO. It is built with Suzuki's HEARTECT platform. Light and highly rigid, it lowers fuel consumption and vastly improves the fundamental vehicle performance in terms of running, turning and stopping. Its frame is characterised by smooth and continuous curves, which efficiently disperses impact energy in case of a collision.

Robust Protection

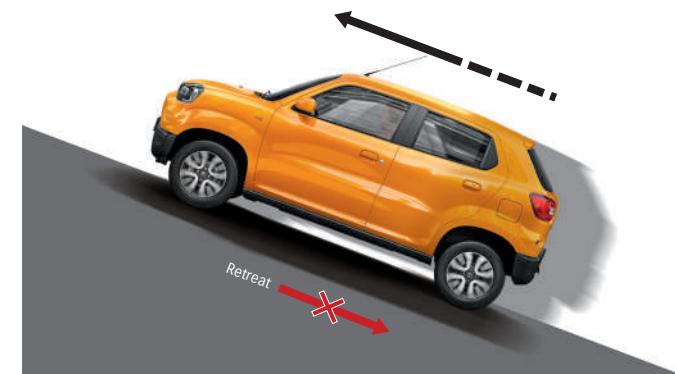

The S-PRESSO lets nothing hinder you from reaching what you set out for. And it does this by keeping you protected on every road you take. With a host of exceptional safety features, the S-PRESSO takes care of you while you enjoy the drive.

ESP®

ESP® detects wheel slip, for instance when you turn the steering wheel sharply and/or the road is slippery, it automatically affects control over the engine torque and brakes to suppress the wheel slip and helps you stay in directional control.

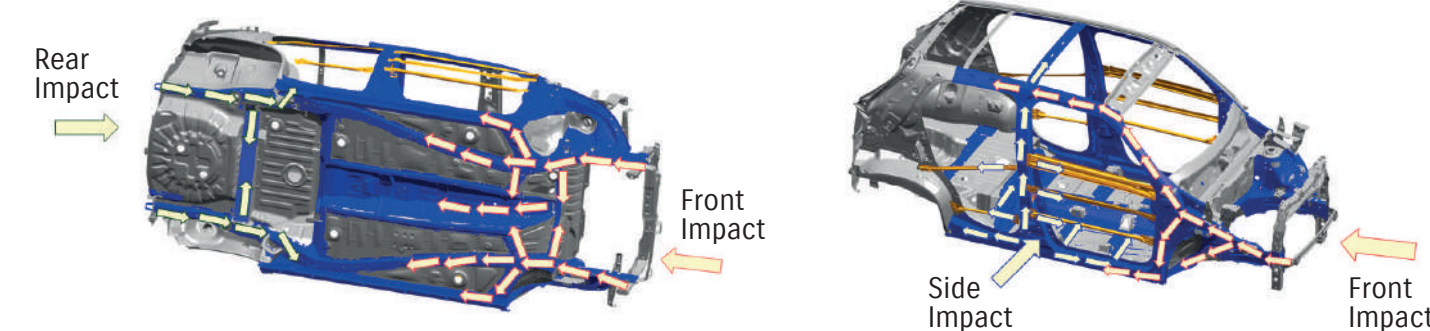

*ESP® is a registered trademark of Mercedes-Benz Group AG.

Hill hold control

Hill hold control is designed to prevent the vehicle from rolling backwards when you restart the car on a slope. It engages the brakes for up to two seconds after you remove pressure from the brake pedal to depress the accelerator.

*Available on AGS

Light, impact-absorbing TECT (Total Effective Control Technology) body

The body design of S-PRESSO centres on Suzuki's TECT concept, which helps protect the cabin in the event of a collision by efficiently absorbing and dispersing energy.

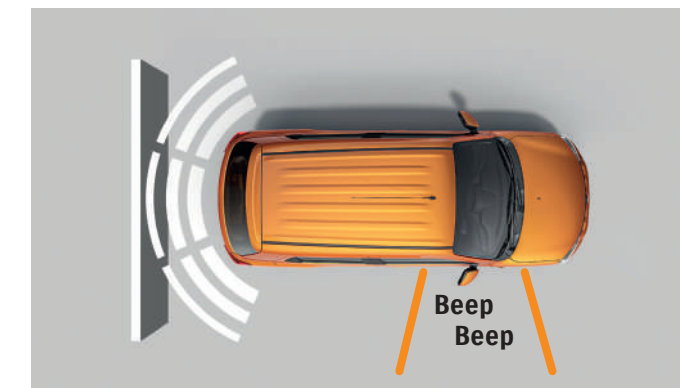

It also widely employs high tensile steel to achieve both lightness and excellent safety performance.

Airbags

The S-PRESSO comes with front SRS airbags as standard for the safety of the driver and front-seat passenger in case of a frontal collision.

*Airbag image is for illustrative purposes only

Rear parking assist system

S-PRESSO comes fitted with ultrasonic sensors in the rear bumper. This means you can get rid of your parking woes, because it helps detect obstacles while you park the car. Warning sounds keep you aware of the distance to the obstacle, making parking a simple task.
