

MULTI CROP THRESHER

SALIENT FEATURES

- High quality bearing for better performance in long use.
- Improved and high quality material
- Robust design for tough operation in fields.
- High quality threshing drum.
- High power fan for better cleaning of crop

MULTI CROP THRESHER

SONALIKA

Thresher is farm equipment that threshes grain, it removes the seeds from the stalks and husks. It does so by beating the plant to make the seeds fall out. With its fast operational speed it is used by our farmers.
